

To Collect
DEEP MEDITATIONS

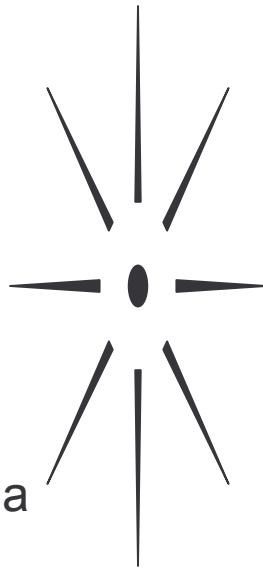

This design has been conceived and crafted with every attention to detail. All work has been done by hand.

The original design was conceived at a Buddhist Sanctuary at Burning Man, a gathering of mystical and eclectic souls.

The dimensions have been mystically calculated using sepher sephiroth:

“to collect Deep Meditations”

I will tell you a great secret, perhaps the greatest of all time.

The molecules of your body are the same molecules of this wood, and the building in which you stand, that burn in the stars themselves.

We are star-stuff, we are the universe made manifest.

Custom woodwork available upon request.

Please ask salesperson for details.
